

Jaap van Netten

Human Movement Scientist; Senior Researcher

Jaap van Netten, PhD, is a human movement scientist, working as senior researcher in Amsterdam UMC. His research focus is on the interplay between biomechanics and behaviour in the prevention of foot ulcers and amputation. This includes a wide variety of interventions, clinical trials, guideline development and implementation efforts. He is also the vice-chair of the International Working Group on the Diabetic Foot, and adjunct professor at the Queensland University of Technology, Brisbane, Australia.

Within ISDF, Jaap is deputy program manager, responsible for the sustainability efforts and involved in the social media.
